## Commercial Composting Collection

Businesses can reduce their trash costs by taking advantage of the large number of composting programs offered by Golden Gate Disposal & Recycling and Sunset Scavenger. Small businesses can compost food scraps, soiled paper and plant trimmings using green carts in the [Fantastic Three](http://www.sunsetscavenger.com/residential.htm) (<http://www.sunsetscavenger.com/residential.htm>) collection program. [Larger businesses](http://www.sunsetscavenger.com/compost.htm) (<http://www.sunsetscavenger.com/compost.htm>) can compost using carts, dumpsters, roll-off boxes and compactors.

The newly implemented Uniform Commercial Rate Structure rewards those businesses that compost by discounting the variable portion of their bill by as much as 75%, commensurate with their recycling and composting volume. So, in addition to helping the environment, businesses can help their bottom line.
